

Occasionally, an instructor may return the wrong file to a student. Fortunately, there is a way for instructors to remove that file from the feedback given to the student.

1. From the **Grade Center** (or any other location that allows the user to grade anything) select the **Action Link** for the assignment. A dropdown menu will appear. Select **Grade Attempts**.

2. On the following page, the file returned to the student will be listed under the **Grade Current Attempt** section. Click the **Mark for removal** link and select **Save**.

**NOTE:** If the student has already looked at the returned assignment, they could have already downloaded the file. However, it will no longer be accessible from eCampus.

**Save** as Draft | **Exit** | **Save** and Exit | **Save** and Next
