

Create a [Squarecap account](#) and [create a course](#) with the same name as your Blackboard course. We recommend that you **don't** allow students to enroll themselves in your Squarecap course since they'll be able to access it via Blackboard:

## Circuit Theory

EE · 410

Allow students to enroll themselves in this course

[+ Add Section](#)

After you've created your course, a "Connect to Blackboard" icon will appear at the top of the course page:

### Circuit Theory

[Manage Roster](#) [+ Add Seat Map](#) [Connect to Blackboard](#)

Clicking on this will open a set of instructions for connecting your course to Blackboard:

1. Log in to Blackboard and navigate to your course
2. Click on **Content > Build Content > Web Link**
3. Under **Name**, write **Squarecap**
4. Under **URL**, copy/paste this course's URL
5. Check **This link is to a Tool Provider**
6. Under **Enable Evaluation**, select **Yes**
7. Under **Web Link Options > Open in New Window**, select **Yes**
8. Click **Submit**, then click on the newly created Squarecap link to complete setup!

After you click on the new Squarecap link, you should see a "Setup Complete!" message.

Once setup is complete, instruct your students to access Squarecap by clicking on the Squarecap link in your Blackboard course under the Content tab. They'll automatically be enrolled in your Squarecap course.

After you've completed one or more sessions, you'll be able to upload and sync grades to Blackboard by clicking the **Upload All** button at the top right.
