

Teach course materials with fun, interactive activities including flash cards, crosswords, matching, self-quizzes.

Enter your terms, facts or multiple choice questions once. StudyMate will convert them into the Flash Cards, Crosswords, Matching, Pick A Letter, Quiz, Challenge, Glossary, Fill in the Blank, Fact Cards and Show All.

**Features**

- 3 easy-to-use templates for entering facts, definitions or multiple choice questions
- Instructors and students can create (and share) an unlimited number of StudyMate projects
- Free mobile apps for students (iOS, Android)
- No limit to the number of images added to StudyMate projects
- See statistics on what students studied, and what they didn't.

**Age of Discovery**

Who invented dynamite? Who was the first person to summit Mount Everest? What's the difference between impressionism and surrealism? You'll learn a little bit about everything with these activities -- inventors, explorers, artists, and scientists. See what you know. Learn what you don't. (Give these activities a try on a smartphone and tablet too!)

**MATCHING**

View the item in the top section and select the matching answer from below. Use 'Next Question' to continue.

The study of heart function and heart disease

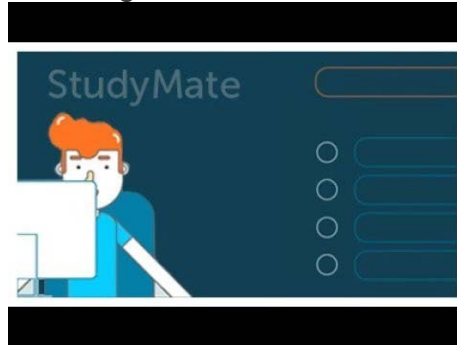

Leonardo da Vinci	Botany	Biology
Richard Byrd	Psychology	Entomology
Robert Peary	Alexander Graham Bell	Cardiology

StudyMate Campus has brief training videos built directly into the application.

Below are a few. A full list of videos can be accessed [here](https://www.respondus.com/products/studymate/demos.shtml).
